EDUCATION

Technological University of Dublin
Studying Computer Science Infrastructure

August 2023 – May 2027
Dublin, Ireland

PROJECTS

FindYourPlayer | *Express.js, React, PostgreSQL, Python, BeautifulSoup*

- Developed a full-stack web application using Express serving a REST API with React as the frontend.
- Used BeautifulSoup and pandas to gather player data.
- Implemented Search based on player name and advanced statistical search.
- Visualized Data using chart.js
- Used Postgresql to store data.

ScoreYourDay | *Springboot, Java, React, Postgresql*

- Developed full-stack, task tracking system, where task completion can be specified and users receive a score based on their tasks.
- Used React on the frontend.
- Added google oauth based login.
- Implemented graph statistical viewing based on user data.
- Added a daily, weekly, monthly and yearly goal, that users can strive to reach.
- Handled authentication and CRUD operations in Springboot server.

PredictPremGames | *Python, Scikit Learn, BeautifulSoup, Pandas*

- Developed a premier league match predictor.
- Used BeautifulSoup to gather team statistics.
- Made a match predictor, that predicts score lines, using scikit learn using the Random Forest Classifier.
